SUMMARY

Software engineer with 2+ years of professional iOS product engineering and a portfolio spanning accessible web apps, mobile products, developer tooling, and cloud services. Builds with TypeScript/React and Swift, with hands-on work in .NET, GIS, serverless APIs, and offline-first data sync. B.S. Computer Science.

SKILLS

- **Languages:** TypeScript, JavaScript, C#, Python, Swift, Rust, Lua, C/C++, SQL
- **Web & mobile:** React 19, React Native, Expo, Next.js, SwiftUI, UIKit, Redux Toolkit/RTK Query, HTML, CSS, Tailwind
- **Services, data & GIS:** .NET 10/ASP.NET Core, Node.js, Effect, REST APIs, Cloudflare Workers, SQL Server, Supabase/PostgreSQL, SQLite/D1, Firebase, Docker, Nginx, ArcGIS Maps SDK, Calcite, Leaflet
- **Testing & delivery:** Jest, Vitest, Playwright, React Testing Library, axe/WCAG, Git/GitHub Actions, CI/CD, Agile, technical documentation

PROJECTS

Vigil | Live demo | React 19, TypeScript, ArcGIS Maps SDK, Calcite | 2026

- Built and deployed an accessible hazard-monitoring map combining live USGS, cyclone, NASA EONET, and ISS feeds; added time-filtered layers, shareable map state, and natural-language map commands.

ArcGIS Migrate | TypeScript, Node.js, ts-morph | 2026

- Engineered an AST-based CLI to audit ArcGIS SDK apps for widget-era migration risks; emits source-linked Markdown/JSON findings with CI severity gates and was validated on a 53-file app.

ReFactor | React 19, TypeScript, .NET 10, EF Core, SQL Server, Stripe | 2026

- Built a full-stack storefront with catalog search and filters, cart and coupons, authenticated Stripe checkout, order history, and admin inventory; packaged the API and SPA in Docker behind Nginx.

Subby | React Native, Expo, TypeScript, Supabase, SQLite | 2026

- Built a cross-platform subscription tracker with Supabase account sync and an offline-first SQLite cache/write queue; added 117 Jest tests and GitHub Actions typecheck/test CI.

Rarify | React 19, TypeScript, Effect, Cloudflare Workers, D1 | 2026

- Deployed a Steam achievement dashboard with Steam OpenID sign-in, schema-validated Worker APIs, cached Steam data, and daily snapshots for progress trends.

Additional projects: TrailFinder (Effect API, React/Leaflet trail search); LFGuild (SwiftUI/Firebase guild matching and real-time chat); TrickOrRoute (Lua addon with shortest-path routing across ~281 stops); Rusty Vault (Rust credential manager using AES-256-GCM and Argon2id).

EXPERIENCE

Optimal State | Software Engineer, iOS | November 2019 - January 2022

- Designed and delivered a Swift iOS app for tracking habitual mental and emotional states, structuring the codebase with MVC/MVVM patterns and documenting its architecture.
- Delivered features from requirements through implementation, testing, debugging, and release in an Agile workflow, triaging issues with stakeholders and the wider team.

Amazon.com | Fulfillment Associate | May 2022 - December 2025

- Investigated inventory discrepancies in a high-volume, deadline-driven environment, contributing to a 20% reduction in shrinkage and coordinating with supervisors to keep fulfillment on schedule.

EDUCATION

Bachelor of Science (B.S.), Computer Science | California State University, San Bernardino | December 2019
