EDUCATION

California State University San Bernardino

San Bernardino, California

Bachelor of Science (B.S.), Computer Science, December 2019

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, C#, Python, Swift, Rust, C/C++, SQL
- **Frameworks & Tools:** .NET, React, Next.js, React Native, Expo, Node.js, Tailwind CSS, Supabase (PostgreSQL), SQLite, Docker, Git, Linux
- **Development Practices:** Software Design, Testing & Debugging, Technical Documentation, Code Review, QA

PROFESSIONAL EXPERIENCE

Optimal State

Software Engineer, iOS · November 2019 - January 2022

- Designed and developed an iOS application in Swift that enabled users to monitor and track habitual mental and emotional states over time
- Wrote clean, maintainable, and scalable code following software design patterns including MVC and MVVM
- Produced technical documentation including architecture diagrams and flowcharts, and performed testing and debugging to resolve defects and ensure application stability
- Collaborated with stakeholders in an Agile environment to gather requirements, triage reported issues, and deliver work packages end-to-end from design through testing and release

Amazon.com

Fulfillment Associate · May 2022 - December 2025

- Collaborated cross-functionally with supervisors and team leads to resolve operational issues and ensure smooth workflow and on-time delivery
- Troubleshoot and resolved inventory discrepancies, contributing to a 20% reduction in inventory shrinkage

PROJECTS

Subby | React Native, TypeScript, Supabase, Expo

- Built a cross-platform subscription tracker for iOS and Android with a dashboard for spending metrics, renewal dates, and usage insights
- Designed a typed React Native architecture with testable feature modules and implemented offline-first sync via a SQLite write queue, backed by 117 Jest unit tests and GitHub Actions CI

ReFactor | C#, .NET, React, Redux, SQL, Docker

- Developed a full-stack e-commerce application with a C#/.NET backend, REST APIs for product search, cart, and checkout, and SQL data storage
- Built a responsive React and Redux frontend and integrated Stripe payments, ASP.NET Core Identity authentication, and a containerized SQL Server

Rarify | TypeScript, Effect, React, Tailwind CSS, Cloudflare Workers, SQLite

- Built and deployed a Steam achievement dashboard on Cloudflare Workers: a React single-page app over a type-safe Effect HTTP API, backed by a D1 SQLite store
- Integrated Steam OpenID authentication, JWT sessions, and a cached Steam API client with nightly snapshot jobs for tracking progress over time
